For the purpose of this Schedule the expression "the Estate" is to be understood as meaning the whole or portion, as the case may be, passing to each person of all the property of the deceased situate outside the Colony as well as the property of the deceased within the Colony.

(a) But when the whole or any portion of such Estate passes to the husband or wife of the deceased absolutely, no Estate Duty is payable on such whole or portion as the case may be.

(b) When the whole or any portion of such Estate passes to the husband or wife of the deceased (otherwise than absolutely) or a lawful issue or ancestor of the deceased, one-half only of such rate is payable on such whole or portion as the case may be, of the property chargeable with the duty.

(c) When the whole or any portion of such Estate passes to any other person than the husband, wife, lawful issue, ancestor, or brother or sister of the deceased, one-and-a-half times such rate is payable on such whole or portion, as the case may be of the property chargeable with the duty.

Note.—The whole or portion of the "Estate" for the purposes of the rate of duty will not in all cases be the same as the whole or portion of the property chargeable with the Duty, as in some cases all or some of the property of the deceased outside the Colony will not form part of the property chargeable with duty.

THE SEVERAL AMOUNTS OF THE LOANS ISSUED AND OF THEIR RESPECTIVE SINKING FUNDS

Present Debt.	REMARKS.
£ s. d.	
...	(a) { These Bonds were payable by the Crown Agents and the Treasurer at their offices in London and Trinidad respectively, by annual instalments, by means of a Sinking Fund equal to one per cent. per annum on the total amount of Debentures issued and five per cent. on the amount of the Bonds already drawn. The repayments commenced in March 1874 and were made by annual drawings, by lot, in the presence of a Notary Public. The Bonds were finally paid off in March, 1911.
...	(b) { These Bonds were payable by the Crown Agents at their Office in London under the same conditions as stated above. The Bonds were finally paid off in 1918.
...	(c) { These Bonds were payable by the Crown Agents by annual instalments, by means of a Sinking Fund equal to one per cent. on the total amount of Debentures issued plus four per cent. on the value of the drawn Bonds. The final payment, in respect of the Bonds issued under Ordinance 8 of 1880, was made in March, 1923. The whole of the outstanding Debentures issued under Ordinance 1 of 1882 were converted into Inscribed Stock in 1896.
49,140 0 0	(d) { These Bonds were redeemable from the 15th June, 1925, by annual drawings to be held by the Treasurer at his Office, in the presence of a Notary Public to be appointed by the Governor for the purpose. The amount payable each year shall be one-twentieth part of the Loan raised. Interest is payable half-yearly on the 15th June and 15th December.
80,020 0 0	(e) { These Bonds were redeemable from the 15th September, 1928, by annual drawings to be held by the Treasurer at his Office, in the presence of a Notary Public to be appointed by the Governor for the purpose. The amount payable each year shall be one-twentieth part of the amount raised. Interest is payable half-yearly on the 15th March and 15th September. Scrip Certificates were redeemable after 15th September, 1919.
250,000 0 0	(f) { These Bonds were redeemable from the 15th August, 1930, by annual drawings to be held by the Treasurer at his Office in the presence of a Notary Public to be appointed by the Governor for the purpose. The amount payable each year shall be one-twentieth part of the amount raised. Interest is payable half-yearly on the 15th February and 15th August.
1,079,160 0 0	(g) { These Bonds were redeemable from the 15th May, 1926, by annual drawings to be held by the Treasurer at his Office, in the presence of a Notary Public to be appointed by the Governor for the purpose. The amount payable each year was one-fourth part of the amount raised. Interest was payable half-yearly on the 15th May and 15th November. The bonds were finally paid off in May, 1929.
322,592 19 6	(h) { Stocks were given in exchange for Bonds in accordance with proposals contained in a prospectus issued by the Crown Agents in April, 1892, by which the holders of Debentures were offered an opportunity of conversion into 4 per cent. Inscribed Stock. The amount of Debentures surrendered in exchange for Inscribed Stock was £346,200. The Stock will be repayable on the 15th March, 1917-1942, by the operation of a Sinking Fund of one per cent. per annum which commenced on 15th July, 1897. Interest on the Loan is payable on 15th March and 15th September. — (Vide Council Paper No. 88 of 1897.)
100,000 0 0	(i) { These Stocks will be repayable on the 15th March, 1917-1942, by the operation of a Sinking Fund of one per cent. per annum of the total amount issued, commencing as from 15th January, 1893. Interest on the Loan is payable on 15th March and 15th September.
400,000 0 0	(j) { These Loans will be paid off on the 15th July, 1922-1944, by the operation of a Sinking Fund of one per cent. per annum of the total amount of Stock issued, commencing as from 15th January, 1898. Interest on the Loan is payable on 15th January and 15th July.
100,000 0 0	
100,000 0 0	
500,000 0 0	(k) { This Loan will be repayable at par on the 15th March, 1917-1942, by a Sinking Fund of one per cent. per annum to be formed under the management of the Crown Agents for the Colonies who are appointed Trustees. The interest at the rate of four per cent. per annum will be payable half-yearly on the 15th March and 15th September in each year by Dividend Warrants, the first payment becoming due on the 15th September, 1914.
£2,651,752 19 6	An advance of £160,000 was, in March, 1915, obtained from the Imperial Treasury to repay advances made by the Crown Agents in connexion with expenditure authorised by Ordinance No. 16 of 1914.
	The terms of repayment were:—
	£92,000 at £100 for each £95 bearing interest at 3½ per cent. ... £ 96,842 2 1
	£371,717 15s. 9d. at £105 5s. 3d. for each £100 bearing interest at 5 per cent. ... 391,278 15 9
£436,778 13 6	Total £488,120 17 10
	The £96,842 2s. 1d. was financed out of the proceeds of the British 3½ per cent. War Loan Stock which was due for repayment on the 1st March, 1928. The amount outstanding at 31st March in respect of this portion of the Book Debt was £88,757 7s. 7d. and it was agreed that the interest as from that date would be at the rate of 4½ per cent. per annum on the outstanding amount. At 31st March, 1928, the outstanding amounts were as under:
	3½ per cent. loan — £88,757 7s. 7d. converted into a loan bearing interest at 4½ per cent.
	5 per cent. loan — £363,575 3s. 9d. continuing to bear interest at 5 per cent.
Total Public Debt— £3,088,531 13 0	The advance is to be repaid by half-yearly instalments of £14,157 19s. 1d. consisting of principal and interest — (M.P. 1981/1924.)

NOTE.—Only approximate areas can be given.

The Classes denote royalty value based mainly on local demand and do not necessarily represent intrinsic values, e.g., Mora is rated a 1st Class timber at Lloyds, though 2nd Class for royalty value. It is put into the 2nd Class in an endeavour to stimulate the demand for this valuable tree which is gregarious over about 100 square miles of the Colony.

(1) These licences are for a specified small number of trees or for a specified quantity of fire wood or other forest produce. The area covered by each is not defined, but trees must be marked by the Forest Authority before being cut.

AREA.—The total area of Forest land is slightly over 1,000 square miles, practically all of which is under commercial timber. Of this area approximately 360 square miles have been set aside as permanent Forest Reserves.

TYPE AND CONTENTS OF FORESTS.—In a general way the Forests may be classified as rain forests, but their composition, with the exception of the mora areas, is very complex. Some of the best known timbers of commerce are :—Cedar (*Cedrela mexicana Roem*) of which very limited supplies are now available, Cypre (*Cordia Alliodora Cham*), Balata (*Mimusops balata var Cruegeri Pierre*), Balsam (*Copaifera officinalis Jacq*), Crappo (*Carapa guianensis Aubl*), Mora (*Dimorphandra mora Benth*), Galba (*Calophyllum antillanum*) Britton and Jeretón (*Didymopanax morototoni*).

Of the above Mora alone grows gregariously and is believed to cover an area of approximately 100 square miles.

FOREST AUTHORITY.—The Forests are administered by the Forest Department and the issue of licences to cut forest produce is controlled by the Forests Ordinance and Crown Lands Forest Produce Rules.

UTILIZATION.—The annual consumption of home grown timber is in the neighbourhood of 2 million cubic feet; the principal consumers are the Petroleum Industry, Government and Estate Railways, Agriculture, the building trade, Public Works, Cabinet Makers, Match Factory, Wheelwrights and Charcoal Burners. In addition to this consumption of home grown timber, about a million cubic feet of coniferous timber is imported mainly for building purposes: a large number of shooks for making boxes are also imported.

STEPS TO PROTECT AND AUGMENT FOREST RESOURCES.—

(a) *Demarcation.* The demarcation of Forest Reserves proceeds at the rate of 15 miles annually.

(b) *Survey of Resources.* A strip enumeration survey has been carried out over a considerable proportion of the Forest area and the work is still in progress. A soil survey is being combined with the enumeration work.

(c) *Utilisation.* There are two forest sawmills in the colony situated in mora forests. There is little doubt but that the exploitation of the mora forest on a large scale is a commercial possibility; the wood is rated A1 at Lloyds and is in quantities sufficient for export.

The biggest handicap to developing the local market is the lack of supplies of properly seasoned native wood. Until this is remedied native timbers will always be at an unnecessary disadvantage.

REGENERATION OPERATIONS.

(d) The objective aimed at is to form 900 acres of plantations annually but this figure cannot be attained until Research work into the initial stages of the growing of Cedar is concluded.

The area now being planted approaches 300 acres annually the species employed being primarily Crappo (*Carapa guianensis Aubl*), Galba (*Calophyllum antillanum*), Black Fiddlewood (*Vitex divaricata*) Sw and Teak (*Tectona grandis Linn*).

WORKING PLANS.

(e) Draft working plans exist covering roughly 5,000 acres of forest where intensive regeneration operations are being carried out.

Simple working plans controlling the yield of cedar are in force over more than 50,000 acres of forest.

7.—SUMMARY of INDUSTRIAL DEVELOPMENT.

7. A summarised statement of any developments in the agricultural, forestal, fishing, mining and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

Cacao.—The principal Agricultural product of the Colony. Government assistance is afforded by Officers of the Department of Agriculture advising planters—large and small—on cultivation, treatment of disease, &c., and by carrying on of experimental work at a Government Cacao estate. As the result of research work extending over nearly twenty years simple means have been placed in the hands of planters for materially increasing their out-put per acre, by making use of the progeny of proved heavy bearers for new plantings, and still more important for replacing naturally poor bearing trees of which there are large numbers on all estates.

Witch broom disease, discovered in 1928, has spread steadily. At the end of 1930 over 1,830 estates covering some 86,718 acres were affected although in many cases only to the extent of a few scattered trees. The control campaign carried out by Government, has been maintained and the original temporary staff of Inspectors has been considerably increased. Cordial co-operation exists between the Department and the Planter but the main factors militating against effective control are lack of cheap working capital and poor prices. The special assistance given to a campaign against the Cocoa Beetle has been continued.

Sugar.—In 1930 the sugar crop was 79,848 tons. Improvements have been effected in the equipment of the larger factories, and by the increasing use of animal, steam and motor-drawn implements for cultivating canes. The Department has a station for experimental work on sugar cane; mainly devoted to raising, and testing of new varieties. Trinidad seedlings are now under estate trial.

A Committee comprised of representatives of all the chief sugar estates, agricultural and commercial bodies, the Imperial College of Tropical Agriculture and the Department of Agriculture, was appointed by His Excellency the Governor and has for five years actively continued investigations on the Froghopper pest of sugar cane. The sugar estates provided half the cost of the investigations during 1930.

Coconuts.—In 1930 the exports of copra, nuts and oil were equivalent to a total of 73,411,834 nuts. As the outcome of past work by the Department of Agriculture the former heavy losses, due principally to Red Ring disease (a nematode), can be avoided. Unfortunately sufficient foresight is frequently not given before planting and in several areas where conditions are not suitable for coconuts the results have been disappointing. Coconuts with disease has caused a considerable amount of loss during the year and a survey of the areas affected has been started.

Food Supply.—Much needs to be done to stimulate the production of food crops. It should prove economically sound to be more self-supporting in this respect. The Ground Provision Depot and Fruit Shop continue to serve a useful function in bringing producer and consumer together.

Fruit.—Increased attention is being given to fruit cultivation, the Department of Agriculture propagating and selling budded and grafted plants of good varieties. Grape Fruit is a promising crop, and interest in the possibility of building up an export trade in grapefruit continues. Promising results are being obtained from efforts by the Department of Agriculture to breed a lime of commercial value, immune to Wither Tip disease. Better prices have given renewed vigour to the lime trade.

Coffee.—The exports of Coffee which were negligible five years ago, rose to an average of £24,000 for 1925–26, but due to adverse climatic conditions fell to £7,238 in 1927, but rose to £10,869 in 1928, and £82,288 in 1929. Owing to low prices the exports for 1930 were valued at £12,475.

Stock.—The importation of thoroughbred animals for breeding purposes has been continued. Government Farms are maintained in both Trinidad and Tobago. Successful work has been done by crossing the local cattle with pure bred imported Holsteins. The milk supply is being improved in quantity by the increase in stock kept and by the entry into the business of certain large estates, and in quality, by the tuberculin testing of cows and by the improved standards adopted as the result of continued educational work by the Medical and Agricultural Departments. A cooling plant has been installed at the Government Stock Farm for Dairy purposes.

Agricultural Credit Societies.—These societies registered under Ordinance, and with the Director of Agriculture as Registrar, now number 39. They are doing useful work in helping the smaller proprietors to obtain loans at a reasonable rate of interest. Some of the societies have been successful in securing co-operation amongst smaller cultivators, particularly cane farmers. A co-operative Cacao Fermentary established in connection with one of the Tobago Societies has produced very useful results.

Asphalt.—The Pitch or Asphalt deposit at La Brea continues to be a fruitful source of revenue. The so-called "Pitch Lake" covering an area of 109 acres more or less has been leased to the Trinidad Asphalt Company since 1st January, 1888. In 1887 the revenue from Asphalt was £5,118, in 1888 the first year of the Concession it bounded up to £17,188, and during the year ending 31st December, 1930, including Export dues and Royalty it amounted to £58,478.

Manjak.—No work was done in this Industry during the year, the Company which operated during the year 1920 having ceased operations for the time being.

Mineral Oils.—There was a continued increase in activity in the Oil Industry during the year 1930. The footage drilled by the various oil companies shewed an increase over that of the previous year, while the quantity of crude oil produced in the Colony during 1930 was the largest yet known, the production being 703,255 barrels more than in 1929. The number of companies operating at the end of the year was fourteen. During the year 9,418,907 barrels of Crude Oil were extracted and 268,758,289 Imperial Gallons of crude oil and refined products were exported.

Petrol, Kerosene and Lubricating Oil continue to be manufactured in local refineries, the production of the first named having practically replaced the imported article.

Petroleum products exported during the year 1930 greatly exceeded in value the products of any other industry and now form more than half the total domestic exports of the colony; the figures being £2,793,695 for petroleum as against £1,136,056 for cacao and £801,718 for sugar, molasses and rum.

Quarries.—Stone and Gravel Quarries are scattered over the Colony. Those in Port-of-Spain and San Fernando are chiefly owned by private parties, whilst those in the country districts are almost entirely owned by the Government.

QUESTIONS.

I. If the Prison is on a separate system, is the separation complete? And, if not, what is the separation enforced by day and night respectively?

II. If not on the separate system, what provision is there for the supervision of the prisoners while in association?

III. How many Cells are there; and how many associated Wards?

IV. Taking the *average* number of prisoners in Gaol
(a) how many cubic feet of space are there for each prisoner during the hours of sleep?
(b) And what superficial area?

ANSWERS.

At the *Royal Gaol, Female Prison* and the *Tobago Convict Depôt* there is separation at night, as far as Cell accommodation permits. At the *Carrera Prison*, and the *Preventive Detention Prison, Mucurapo*, there is separation at night. By day the majority of the prisoners work in association. At the *Juvenile Prison, Mucurapo*, the prisoners sleep in a Dormitory.

All prisoners in association by day are under the constant supervision of Male Officers, if males, or of Female Officers, if females. The male prisoners in association during the night are frequently inspected by Officers, through inspection holes in the doors.

QUESTIONS.

ANSWERS.

V. How are the prisoners classified ?

1st Class—Debtors: Persons committed for non-payment of any tax or duty to the Crown, or any public or local rate, or for contempts; persons committed for want of security for their appearance as witnesses; persons committed by the Supreme Court and ordered to be treated as first class, and persons committed for trial or further examination.

2nd Class—Prisoners not sentenced to hard labour; and those committed for want of security to keep the peace.

3rd Class—Prisoners committed under the Immigration Ordinance.

4th Class—Military prisoners.

5th Class—Prisoners under sixteen years of age.

6th Class—All other prisoners.

VI. Is penal labour---that is, labour by treadmill crank, or shot drill---in force?

No.

VII. If so, during what periods of imprisonments, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of tread-wheel labour, give, first, the total time on and off at the wheel, &c.; secondly, the length of spells and intervals of rest.

See answer to VI.

VIII. What kind of labour, other than penal labour, is in use?

ROYAL GAOL:—

Working at trades, picking fibre, making fibre matting and in the necessary service of the prison, cutting timber for fire wood—at Chancellor Road, on grounds around Government House, St. Ann's, at various trades and on such other labour as the Governor directs.

A gang of prisoners is employed at the garden at the Mucurapo Pasture for supplying ground provisions to the Prisons.

Females are employed at needlework, laundry work, fibre work and at the Prison garden at Mucurapo.

Carrera Prison:—Quarrying stone, breaking metal, picking fibre, making mats, at various trades and in the necessary service of the Prison.

Tobago Convict Depot:—Convicts are employed at the Government Farm, on Sanitary work connected with the Warden's Department, and in the necessary service of the Prison.

Juvenile Prison, Mucurapo:—Making and mending clothing, garden work, and in the service of the Prison.

Preventive Detention Prison:—At garden work and at trades.

What is the source of the Water Supply; the Quality and amount of Water available for all purposes expressed in gallons per Patient?

The source of water supply is rain water from rainfall collected in cisterns with catch from houses. The cisterns are covered with wire netting. The quality is good rain water. 9 gallons are estimated as available daily for all uses.

I. Lavatories—

What is the total number, and average number of Patients to each?

None.

II. Baths—

(a) What is the total and average number of Patients to each?

There are 8 fresh water baths to each of which an average of 30 infirm patients have access.

(b) How often are the Patients bathed?

There is unrestricted bathing.

(c) Is fresh water given to every Patient?

The patients bathe in the sea; only patients in the Infirmary get fresh water baths.

(d) Is the supply of hot water adequate?

No hot water baths.

(e) Is a responsible official or attendant always present during bathing?

No. Bathing parties are continuous throughout the day; at each of the three bathing places warning notices are posted. An adult accompanies children about to bathe.

III. Latrines—

What is the total number, and the average number of Patients to each seat?

Forty-five seats are available, giving an average of 1 seat for 9·5 inmates.

OCCUPATION.

State the extent of—

- (I) The airing court
(II) And other grounds

} These distinctions do not apply in practice. The men have upwards of 100 acres at their disposal; the women and children 40 acres.

Are the Patients, as a rule, given daily exercise, their health permitting?

Patients are desired to take as much exercise as possible without undue fatigue.

Are they confined to airing courts, or allowed to walk in other grounds, and sent beyond the Asylum?

They are encouraged to utilise to the utmost the areas indicated above.

Are any means taken to amuse the Patients, or to induce them to amuse themselves? Detail them.

Swimming, cricket, football and other forms of active exercise and vegetable gardening are encouraged. The inmates play chess, draughts, cards, dominoes, &c. Dances, concerts and theatricals and athletic sports are allowed from time to time. Many inmates keep poultry as a source of interest and profit; some fish. There is a cinematograph.

How many religious services were held in 1930

A resident priest (R.C.) holds daily services. An Anglican Clergyman holds approximately fortnightly services and his Catechist alternates him. A Presbyterian minister holds services about every third Wednesday and his Catechist visit on other Wednesdays. Seventh Day Adventists conduct their own services. No information is available in respect of non-christian faith.

What was the average attendance?

Not known.

In what building, and how many could it contain?

One Protestant Church to seat 120. One R.C. Church to seat about 150. One R.C. Church to seat about 100; One cottage (Seventh Day) to seat about 80.

METEOROLOGICAL NOTES, 1930.

Air Pressure.—As usual this was extremely constant, showing only a small diurnal variation.

Temperature.—The records show no marked departure from the normal. The extreme range was between 62° F. and 96° F. The lowest temperatures occur mainly in the months February and March. There is very little variation in the highest daily temperature, the mean monthly maximum ranging between 88° F. in January and 92·8° F. in November.

Humidity.—In the early morning throughout the year the relative humidity was 91 and over, with the exception of January when it was 86. In the dry season it falls considerably by the afternoon, whereas in the wet months the decrease is not as large. These conditions are normal

Rainfall.—The rainfall for 1930 at St. Clair Experiment Station, Port-of-Spain, was below normal, the total fall was 45·28 inches, as compared with 63·41 the average over 68 years. The rainfall is recorded from some 100 stations, the range being from about 50 inches to 150 inches. The greatest precipitations are obtained in the Eastern districts and in the valleys of the Northern Range.
